AKASH B

DevOps | machine learning
Akash B | akashb1704@gmail.com | +91 6382426191 Salem

PROFESSIONAL SUMMARY

Cloud & DevOps enthusiast with strong problem-solving, optimization, and debugging skills. Adept at quickly learning new technologies, ensuring comprehensive testing, and fostering strong collaborative relationships with extended teams. Passionate about applying technical expertise and machine learning knowledge to deliver scalable, cloud-native solutions. Skilled in AWS, Terraform, Ansible, Docker, and Kubernetes with a solid foundation in networking and security.

Cloud & DevOps Hands-On Experience

- **Amazon Web Services (AWS):** Practical experience with EC2 (launching, managing instances), VPC (subnets, route tables, security groups), S3 (storage, lifecycle policies, versioning), RDS (provisioning and managing databases), Route 53 (DNS management, routing policies), and IAM (user/role/policy management, security best practices).
- **Networking:** Fundamentals of TCP/IP networking, routing and switching concepts; basics of routers and switches; knowledge of network debugging tools and troubleshooting techniques, with hands-on exposure considered a strong plus.
- **Terraform**: Exposure to Infrastructure as Code (IaC), including basics of providers, resources, variables, and state management; practiced creating modules and using functions for reusable configurations.
- **Ansible**: Hands-on with playbooks, roles, ad-hoc commands, and configuration management for automated provisioning and deployment**.**
- **Docker:** Experience in containerization, writing Dockerfiles, managing images & containers, setting up volumes & networks, and working with Docker Swarm for orchestration.
- **Kubernetes:** Strong practical exposure to Pods, Deployments, Services, ConfigMaps, Secrets, Ingress, Namespaces, Helm charts, and cluster management concepts; worked with orchestration of containerized applications end-to-end.

SKILLS

Cloud & DevOps Tools

- **AWS:** EC2, VPC, S3, RDS, Route 53, IAM
- **Infrastructure as Code:** Terraform (providers, resources, variables, modules, functions)
- **Configuration Management:** Ansible (ad-hoc commands, playbooks, roles)
- **Containerization & Orchestration:** Docker (Dockerfiles, images, volumes, networks**,** Swarm), Kubernetes (Pods, Deployments, Services, ConfigMaps, Secrets, Ingress, Helm charts)

Machine Learning & Programming

- **Programming Languages:** Python, Java, C, C++, SQL
- **ML Concepts:** Data preprocessing, model development, evaluation metrics (accuracy, precision, recall)
- **Libraries & Tools:** NumPy, Pandas, Matplotlib, Scikit-learn, Git/GitHub

UI/UX Design

- **Design Tools:** Figma, Adobe XD, Canva
- **Design Skills:** Wireframing, Prototyping, Responsive Design, Accessibility, User-Centered Design Principles
- **Focus Areas**: Improving usability, enhancing user engagement, and building intuitive interfaces

Certifications

- **AWS Training & Certification**
  - Introduction to Machine Learning: Art of the Possible
  - Getting Started with AWS CloudFormation
  - Getting Started with DevOps on AWS
- **Programming Certifications**
  - Python Foundation Certification (twice completed)
  - Programming using Java

Education

Sona College of Technology – with specialization in Artificial Intelligence & Machine Learning
2022 – 2026 | GPA: 7.5/10

Additional Skills

- Strong problem-solving and analytical thinking
- Effective communication and active listening
- Team collaboration and relationship building
- Adaptability and quick learning of new technologies
- Time management and organizational skills
- Creative approach to troubleshooting and debugging
- Leadership potential with a proactive mindset
- Attention to detail and commitment to quality
